AESTHETICS AND FUNCTIONALITY

unidrain® is known for streamlined and elegant design, which makes it possible to combine both aesthetics and functionality. It's been more than 10 years since unidrain® launched its groundbreaking floor drain which changed the standards of modern bathrooms, and ever since, more products have been added.

In 2010 we introduced the exclusive floor drain series Highline, which won several design awards. High Line series offers the ability to create a unique solution for your bathroom.

FOR HIGHLINE

HIGHLINE SERIE

HighLine is unidrain®'s exclusive, award-winning series. The series is available in both solid steel panels, and a discreet solution with a floor tile of your own choice. HighLine is the series for those who want a little extra luxury in everyday life.

- 1 HIGHLINE | PANEL with frame
- 2 HIGHLINE | CUSTOM without frame, A floor tile of your own choice is placed on the top
- 3 HIGHLINE | CUSTOM with frame
- 4 HIGHLINE | CASSETTE with frame with edges on all sides for use with any material. Ideal for terrazzo for instance.

HIGHLINE floor drain | Panel in frosted glass black with frame

HIGHLINE PANEL

Choose between solid brushed stainless steel or frosted glass in white or black.

HIGHLINE floor drain | Panel with frame

GLASSLINE SHOWER SCREEN

The range of shower screens are solidly installed without visible screws or fittings. Only a discreet steel frame is visible along the wall and floor, showcasing the elegant lines and providing a timeless look.

Our shower screens are transparent or with exclusive decoration in silkscreen print. The shower screen is mounted on a rail on the wall and can be replaced in case of damage. Glass surfaces are treated with Cleantec for easier maintenance.

HIGHLINE CORNER DRAIN

The corner drain is the simple and discreet solution for bathrooms and utility rooms where space is limited. The corner drain comes as steel panel with/ without frame and as Custom solution. The frame is optional but is designed to emphasise the exclusive design of the floor drain. The height of the frame (10, 12 or 25 mm) depends on the thickness of the floor tile.

Glue own material such as matching floor tile on the base to complete the custom solution. The Custom solution is placed directly inside the unit.
